CARBIDE MILLING TOOLS

English catalogue | Version 3.0

Company profile

Guangdong Hentry Tool Technology Co., Ltd provides cutting tools and drawing-based tooling support for machining applications. The product range includes carbide milling tools, solid carbide drills and PCD reamers.

For a milling-tool enquiry, share the workpiece material, feature drawing, machine and holder conditions, quantity and acceptance requirements.

Overview

Engineered Milling Cutter Solution

We have decades years of experience in designing and manufacturing carbide end mill cutter bits tools to support the machining manufacturers. HC offers the best practices, engineering, intelligence to allow us to focus on creating custom-engineered solution, whether it's small or mass quantity, we can generate the best solution to improve the productivity.

Our Capacity

We supply a wide range of carbide end mill cutter bits for both roughing and finishing operations. Standard or special carbide end mills are available. They can be manufactured as solid carbide or coolant through.

---	------

Meaning Of Icons

A
ULTRA-HIGH
HARDNESS
MILLING

Suitable for machining ultra-hard materials with a quenching hardness of 62-68 HRC.

Tool with three flutes.

B
HIGH
HARDNESS
MILLING

Suitable for machining ultra-hard materials with a quenching hardness of 58-62 HRC.

Tool with four flutes.

C
GENERAL
MILLING
CUTTER

Suitable for machining hard materials with a quenching hardness of 48-50 HRC.

The tool is suitable for slotting

Tool with a 45-degree helix angle.

The tool is suitable for die-sinking

D
NON-FERROUS
MACHINING
MILLING
CUTTER

Tool with a 40-degree helix angle.

The tool is suitable for face milling.

Tool with a 38-degree helix angle.

The tool is suitable for side milling.

E
CARBIDE
DRILLING

Tool with a 35-degree helix angle.

The tool is suitable for slot and small parts.

Tool with a 30-degree helix angle.

The tool is suitable for contour profile milling.

F
CARBIDE
REAMERS

Ball nose tools with a 30-degree helix angle.

The tool is suitable for helical interpolation

G
WOOD
WORKING
TOOLS

Tool with a single flute.

The tool is suitable for trochoidal

H
CARBIDE
CUSTOM-MADE
TOOLS

Tool with two flutes

The tool is suitable for corner radius

TOOLS

TiSiN-AR

Black

Extended tool life and high wear resistance.
Suitable for processing high-hardness quenched steel and mold materials.

ALTiSiN

Bronze

High wear resistance, excellent high-temperature performance.
Universally suitable for conventional iron parts and high-temperature alloy processing.

ALTiN

Dark gray

Superb surface finish, anti-stick properties, enhanced wear resistance.
Extended tool life, perfect for stainless steel machining.

DIAMOND

Matte black

Special CVD coating, multi-layer film, outstanding wear resistance, and stability.
Suitable for graphite material processing.

FSiN

Light gold

Developed for high-gloss copper electrode machining with multi-layer film.
Excellent surface finish, and high wear resistance.

DLC

Black/Transparent/Colored

DLC coating can improve wear resistance, reduce friction, prevent tool sticking, increase cutting speed, extend tool life and improve surface quality.

Micro Diameter Miniature 2 Flutes End Mill

Micro Diameter Miniature 2 Flutes Ball Nose End Mill

- Specialized tungsten carbide end mills for post-heat-treated materials.
- Superior chip evacuation, excellent finish in high-speed, high-hardness machining.
- Utilizes 0.4mm round rod, non-uniform groove, TiSiN-AR coating for mold steel up to HRC65.

Micro Diameter Miniature 2 Flutes End Mill

Micro Diameter Miniature 2 Flutes Ball Nose End Mill

- Precision-designed ultra-micro carbide blanks for versatile milling applications.
- High-performance end mills for low hardness materials like alloy, tool, and carbon steels.
- Enhanced durability with a nano-coating for smooth chip evacuation.

4 Flutes Square End Mill

- Precision-designed ultra-micro carbide blanks for versatile milling applications.
- High-performance end mills for low hardness materials like alloy, tool, and carbon steels.
- Enhanced durability with a nano-coating for smooth chip evacuation.

Micro Diameter 4 Flutes Rib End Mill

Micro Diameter 4 Flutes Rib Corner Radius End Mill

- Precision-designed ultra-micro carbide blanks for versatile milling applications.
- High-performance end mills for low hardness materials like alloy, tool, and carbon steels.
- Enhanced durability with a nano-coating for smooth chip evacuation.

Long Shank 3 Flutes Corner Radius End Mill For Aluminum

- Precision machining with 0.2mm round rod and polished grooves, mirror-like finish.
- Ideal for IT, aerospace, excelling in wear resistance for 7-series aluminum.
- High-speed aluminum machining with excellent performance, smooth surface, and reduced debris.

Long Shank 3 Flutes Corner Radius End Mill For Aluminum

- 45-degree helix, double-edged, polished grooves for smooth chip removal and fine surface finish.
- Versatile for semi-precision and precision machining of 5-series and 6-series aluminum sheets.
- Outperforms AL700 and AL500 with better cost-effectiveness and toughness, suitable for precision applications.

2 Flutes Ball Nose End Mil

- Utilizes ultra-fine grain tungsten carbide, ideal for graphite applications.
- Features advanced high-purity thick-layered diamond-coating technology.
- Designed for dry cutting of graphite electrodes and high-silicon alloys.

Micro Diameter Miniature 2 Flutes End Mill

Micro Diameter Miniature 2 Flutes Ball Nose End Mill

- Ideal for precise copper electrode machining with superb finish.
- Precision below 0.005mm and profile accuracy of 0.003mm.
- Tailored for copper molds, alloy, and non-ferrous metals, ensuring quality, durability, and stability.

2 Flutes Ball Nose End Mill

- Ideal for precise copper electrode machining with superb finish.
- Precision below 0.005mm and profile accuracy of 0.003mm.
- Tailored for copper molds, alloy, and non-ferrous metals, ensuring quality, durability, and stability.
